SKILLS

HTML | Css | Sass | Js | React
Redux | Firebase | Typescript | Material UI
React Native | Ant Design | React Query

PROJECTS

Kalom.uz (Next.js, styled-components, Ant Design, TS)
- Kalom.uz is my first startup project that helps to people learn Quran. This project is not ready to production. I am working it nowadays

23tv.uz (React, Material UI)
- I worked this project as a Freelancer and my main job was create UI components and make it mobile responsible

Eduon.uz (Next.js, SASS)
- Eduon is online educational platform that connects teachers and students one place. if you were teacher, you can teach here and make some income. I worked here as a Fronted developer for about 4 month.

Buduar (ReactJs, Ant Design, Firebase, ThreeJS, TS)
- Buduar is online podium platform. You can upload dress pictures and get some models with your dress. But project was not completed beacause of finantional problems

Daftar.uz - POS system (ReactJs, React Query, TS)
- Daftar is Point of sales project that helps shops to sell and manage it. I work on this project as a Middle developer. I have implemented folder structure, managed store, implemented hooks and so on.

Famic.io (ReactJs, Typescript,)
- For influencers, famic.io is a public, online profile and media kit platform. Think of it like LinkedIn designed for influencers. For businesses, famic.io is a comprehensive toolkit to run an influencer marketing campaign. You can discover influencers, invite them to campaigns, and work with them. My job here was check workmates code, implement task for them and implement main logic of site.
